CORN AND COB MILL YOUNG AMERICA. Invented and Patented by Charles Leavitt

This Mill is adapted to the variour Grinding and Cruthing purposes, for feeding steels of all

kinds. It will grind more rapidly in proportion to power used, and will last ten times as long as any mill of the kind. The great advantage it has over all others consists in the Movable Grinding Plates, which are made separate from the main body of the mill, of superior hard metal, and can be taken out and replaced by others in a few minutes time, upon the principal new points are put to lows, thus making a perpetual mill, as no other part is at all liable to wear out.

The Grinding Flates are made of different qualities, thus making a mill adapted to Grinding Hard and Dry Corn and Cob, and Soft and Damp Corn and Cob, and also for Grinding Sherfled Corn, Rye, Oats, &c., and indeed, any and every thing in the food line.

It is also provided with a simple and convenient arrangement for discharging the meal at a out on one side of the mill,—saving expense of handling, annoyance and loss of gest by owing away, as is the case in all other mills. It has but one set screw to regulate the quanty ing, and no simple in its construction that it can be managed by a ci-

This mill was awarded the first Premium at the GREAT NATIONAL FAIR, at Louisville, Ky., for 1857, over Little Giant, Star, and Magic Mills, and was awarded Five Hundred Dellats Silver Service, at Indiana State Fair, for 1856; and the first Premium at the State Fair of Ohio, 1855-6, and New York, Tennessee, Microsota, Michigan, North Carolina, and orge One Hundred other State, District and County Fairs, for 1856, and since his inauguration in 1866; it has taken more Premiums than all its competitors combined, and now stands before the public without a rival
